(54) Title: **HINGE ARRANGEMENT FOR THE FRONT DOOR OF A CABINET**

(57) Abstract: A hinge arrangement for the front door of a cabinet, comprising a hinge body (20) affixed to a lower front edge (11) of the cabinet (10) and carrying an upwardly projecting hinge pin (30), maintaining a certain spacing from the lower front edge (11) of the cabinet (10) and around which the front door is inferiorly journaled. A shoe (40) is inferiorly mounted to the hinge body (20) so as to be selectively manually displaced between an inoperative position, in which it is operatively spaced from the floor (P) that supports the cabinet (10), and an operative position, in which it is seated on the floor (P), in order to transfer to the latter the weight of the front door and to lock the cabinet (10) against displacements on the floor (P).
